PROFILE

Senior software engineer with 15+ years building production commerce applications, APIs, and enterprise integrations. Experienced in TypeScript, Node.js/NestJS, Next.js/React, PostgreSQL, AWS, asynchronous workflows, and production troubleshooting. Personally developed multiple commerce systems supporting tens of thousands of products; independently building AI engineering tools and a marketplace.

TECHNICAL EXPERTISE

Backend & frontend: TypeScript, JavaScript, Node.js, NestJS, Express, Next.js, React, GraphQL/Apollo, REST APIs

Cloud & data: AWS (ECS, Amplify, Cognito), Azure, PostgreSQL, DynamoDB, MongoDB, Redis, Linux

Systems & tooling: API integrations, data synchronization, authentication, CI/CD, testing, Git, incident troubleshooting, OpenAI APIs, Contentful, Algolia, ERP/iSeries

PROFESSIONAL EXPERIENCE

Full Stack Web Developer | CFS Brands | Oklahoma City, OK | Sep 2023–Present

- Build and support production B2B commerce applications with Next.js, React, TypeScript, NestJS, GraphQL, PostgreSQL, and cloud services.
- Engineer and troubleshoot integrations across Contentful, Algolia, catalogs, inventory, customer workflows, and ERP/iSeries systems.
- Investigate search-indexing, synchronization, and order issues; contribute to architecture discussions, tests, code review, and delivery.
- Develop OpenAI-assisted content and workflow automation with engineering review and verification.

Full-stack Developer | StatGear | Jan–Sep 2023

- Developed multi-vendor commerce features and cloud-backed services using AWS Amplify, DynamoDB, ECS, and Cognito.

Full-stack Developer | Demon's Custom Cycle | Dec 2021–Jan 2023

- Built Next.js interfaces and NestJS/Apollo GraphQL services; integrated Flxpoint, Shopify, SkuVault, and vendors across ~65,000 products.

Web Developer & E-commerce Integration Engineer | UA International | Feb 2016–Dec 2021

- Personally developed four separate applications for multichannel commerce, product publishing, competitive pricing, and inventory/order operations.
- Multichannel dropshipping: integrated vendors and Flxpoint with commerce channels; documented synchronization scope of ~35,000 products for eBay/Amazon workflows; built Node.js/GraphQL/AWS/DynamoDB services and React/Redux interfaces.
- Product publishing: developed a React Native mobile application to automate cross-channel product content preparation and publishing.
- eBay pricing: developed a separate application for competitor-price comparisons and configurable pricing rules.
- Inventory/order management: built a separate Node.js/Express/MongoDB and React/Redux application supporting ~25,000 products, orders, labels, and tracking.

SELECTED INDEPENDENT PROJECTS

AgentForge | Private · In development

- Private · In development. Building a CLI-first TypeScript/Node.js engineering automation tool; work includes run lifecycle, typed contracts, audit events, validation controls, approval boundaries, and GitHub publication/recovery mechanisms.
- Full end-to-end issue-to-PR operation is not represented as independently validated or production-ready.

Teloire | Pre-launch · In development

- Pre-launch · In development. Designing a Next.js/React and NestJS/PostgreSQL fashion marketplace with discovery and commerce workflows; product capabilities are at differing implementation stages.
- Not publicly accessible; no claims of active customers, production usage, or completed seller-import/queue workflows.

EARLIER & PARALLEL EXPERIENCE

Independent Full Stack Web Developer & E-commerce Consultant (project-based), Apr 2011–Present • Gridics, Web Developer, Jun 2015–Feb 2016 • PDVSA, Server Analyst, Mar 2003–Aug 2015 • JL Technology, Founder & Technology Consultant, Nov 2011–Apr 2015

EDUCATION

Computer Engineering studies | Universidad José Antonio Páez, Venezuela | 2000–2004 (degree not claimed)
