PROFESSIONAL SUMMARY

Senior software engineer with 15+ years delivering production web applications, backend services, and enterprise commerce integrations. Experienced in TypeScript/Node.js, NestJS, React/Next.js, cloud platforms, APIs, data synchronization, and troubleshooting business-critical workflows. Also builds independent AI-enabled SaaS and developer tooling.

TECHNICAL SKILLS

Languages & frameworks: TypeScript, JavaScript, Node.js, NestJS, Express, Next.js, React, React Native, GraphQL/Apollo, REST APIs

Data & cloud: PostgreSQL, Supabase, Redis, BullMQ, DynamoDB, MongoDB, AWS (Amplify, ECS, Cognito), Azure, Linux, Git, CI/CD

Integrations & AI: OpenAI APIs, eBay APIs, Stripe, Contentful, Algolia, ERP/iSeries, Shopify, vendor and inventory integrations

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CFS Brands | Sep 2023–Present

- Engineer and maintain enterprise B2B commerce applications and services using Next.js, React, TypeScript, NestJS, and API integrations.
- Integrate Contentful, Algolia, catalog and inventory data, customer workflows, and ERP/iSeries systems; investigate synchronization and indexing failures.
- Troubleshoot production search and order workflows, support testing and code review, and deliver fixes across interconnected services.
- Develop OpenAI-assisted content and workflow automation with engineering verification and review.

Full-Stack Developer | StatGear | Jan–Sep 2023

- Developed multi-vendor commerce functionality and cloud-backed services using AWS Amplify, DynamoDB, ECS, and Cognito.

Full-Stack Developer | Demon's Custom Cycle | Dec 2021–Jan 2023

- Built Next.js user interfaces and NestJS/Apollo GraphQL services; integrated Flxpoint, Shopify, SkuVault, and vendor systems across approximately 65,000 products.

Web Developer & E-commerce Integration Engineer | UA International | Feb 2016–Dec 2021

- Designed and developed four distinct applications for multichannel commerce, mobile publishing, competitive pricing, and inventory/order management.
- Built eBay/Amazon dropshipping and vendor integrations supporting approximately 35,000 products using Node.js, GraphQL, AWS/DynamoDB, and React/Redux.
- Developed a React Native publishing application and a separate eBay competitor-pricing tool with configurable pricing rules.
- Built an inventory and order management application using Node.js/Express, MongoDB, and React/Redux supporting approximately 25,000 products, labels, and tracking.

SELECTED INDEPENDENT PROJECTS

Metoras | **Functional private preview** | Independent SaaS | metoras.com

- Built an AI-powered eBay seller platform with Studio for photo-assisted listing creation and publishing, and Copilot for reviewable listing analysis and optimization.
- Designed Next.js and NestJS services with PostgreSQL/Supabase, asynchronous processing, OpenAI and eBay API integrations, Stripe, and image-processing services.

AgentForge | **Private, in development** | Developer tooling | jagnoha.dev/projects/agentforge.html

- Building a local-first TypeScript/Node.js engineering automation CLI with typed contracts, run lifecycle, validation evidence, human authorization boundaries, and guarded GitHub draft-PR publication/recovery. Not production-ready.

Teloire | **Pre-launch, in development** | Marketplace | jagnoha.dev/projects/teloire.html

- Developing a Next.js/NestJS/PostgreSQL fashion marketplace with discovery and commerce workflows; seller imports and some production capabilities remain planned.

ADDITIONAL EXPERIENCE

Independent Full-Stack Developer & E-commerce Consultant (project-based), Apr 2011–Present

Gridics, Web Developer, Jun 2015–Feb 2016 | PDVSA, Server Analyst, Mar 2003–Aug 2015

JL Technology, Founder & Technology Consultant, Nov 2011–Apr 2015

EDUCATION

Computer Engineering coursework | Universidad José Antonio Páez, Venezuela | 2000–2004 (no degree awarded)
